Hi r/civ, after the recent Civilization Revolution 2 on Androids, with which I was very disappointed, I saw a comment in a thread on Civ 5. After some investigations, I discovered that there was actually a mobile version called Civilization 5, a mobile game, and almost no information on the Internet. It's a Java game, so it doesn't work for Android, but it can start with emulsion. The only thing I managed to get a job is a phoneME that can be downloaded from the dev site. I will not tell where you can find the game file, because it is probably not allowed, and it is no longer sold by Gameloft, you will need Jar and jad file to start it. In fact, the game is a cut version of civ 5, it is also animated! Here are some squeaks I did working on my phone, which is nexus 4 Run kitkat action. I'll be happy to answer any questions. Essentially, the game is a striped version of civ 5, even animated! Here are some screenshots I ran from him on my phone, which is an action gatkat of the connection 4.
