You can enjoy the latest MIUI 12 on your Redmi Note 8 Pro. Also read how to install Google camera on REDMI 8 class. If you prove yourself, you can install the latest MIUI update on Redmi Note 8 Pro. If you follow this process, let us know in the comments and we'll try to get back to you as soon as possible. Amid much fanfare, Xiaomi recently announced MIUI 12 and released the first closed beta for several devices. As with MIUI, closed beta is usually first released in China and then rolled out to the rest of the world. In this scenario, Xiaomi users worldwide cannot experience the new Miui 12 build. Nevertheless, we were able to flash Miui 12 on our Redmi K20 in TWRP. Not to mention, we've also rounded up the top 25 Miui 12 features so you can see all the exciting new features. So ifYou are also looking for a way to install MIUI 12 on Xiaomi devices so you have come to the right place. In this article, we will guide you through the whole MIUI 12 installation process with Step-By-STEP instructions. Without wasting a single moment, go to the guide and we will find out how to install MIUI 12. Requirements 1. First you need a start-up charger. If you haven't already done so, you can try this method to unlock the start-up charger instantly. Enter the old MI account you unlocked in the past. I tried this method on my Redmi K20 and the start-up charger unlocked immediately without waiting. Also, don't forget that the start-up charger will completely erase your device. Therefore, keep a copy of all files and folders. 2. Otherwise, you need to configure ADB on your computer. 3. Then download TWRP on your specific device's official website. You can also find the latest TWRP version from the XDA forums for your Xiaomi device. 3. Finally escape the ROM MUI 12 from the section below. Download Miui 12 RESTORMANT ROM, which is Chinese ROM MIUI 12 compatible with Indian options [only for K20 Pro, K20 and POCO X2] for certain devices launched in India A difference in code names. Fields for example youngsters K20 Pro like Raphael in China and Raphaelin in India. Likewise, K20 will be prepared by Davinchi in China and Davinkin in India. Finally, the Poco X2, renamed Redmi K30, was called Phoenix in China and Fenixin in India. As we can see, they are added to all Indian code names. So all we have to do is add the code at the end of the name and you're good to go. After that, the Chinese ensemble Miui 12 will be compatible with Indian options. Therefore, fulfill error 7 on TWRP when installing MIUI 12. Here is how you can do it. 1. Download the MIUI 12 ROM for your device (K20 Pro, K20 or POCO X2) from the section above. Remember to download the file to your computer. 2. Then install Winrar (free) on your computer if you don't have it. Then right click on the MIUI 12 ROM and select "Stamina" in MIU. Here, right click on the update script and open the notebook. 4. Add to the end in the first lineFor example here I changed Davinci to Davincina. 5. Now click on "File" and Save. Finally, close the text file. 6. Then go to the main folder and select all files and folders. Then right-click on the selection and select 'Add to archive'. 7. Here, select "ZIP" as the archive format and click "OK" button. 8. After a few minutes, a new ZIP file will be created in the same root folder. This is now your updated version of MIUI 12 and you can transfer it to your smartphone for further installation. Install MIUI 12 on any Xiaomi device, I guess you have already downloaded MiUi 12 Roma, TWRP and unlocked bootloader. Also, remember to back up all your personal files and folders, as this process will destroy your entire device. 1. First, flash the MIUI 12 ROM on your Xiaomi device if you have downloaded it on your computer. 2. Next, connect your device to your computer and run ADB. Then run the following command to boot your device into FastBoot mode. ADB Reboot Bootloader 3. Once you enter FastBoot mode, run the FastBoot device and test the connection. If it returns a serial number, the device is successfully connected to the computer. 4. Now run the following command to install TWRP. Remember to rename the TWRP file to recovery and place it in the same ADB folder. RASTOOT FLASH FLASH RECURETORE.IMG 5. After installing TWRP, disconnect your device from the computer. Now press and hold the volume buttons and the power buttons at the same time. Once the device restarts and displays the MI/Redmi/Little logo, release the buttons. You will now boot directly into TWRP. 6. Now go to wipe -> Advanced wipe and select Dalvik, Cache, System, Data and vendor. Don't forget to touch the internal memory as it stores the MIUI 12 ROM file. 7. At the end go to install and select the Miui 12 ROM file and go to install. 8. After installation, go to "Cancel" again and click "Data Size". Now put "yes" and it will erase the device completely. This step is necessary to exit the encryption cycle. 9. Finally, click "Reboot System" and you will boot into MIUI 12 directly. If TWRP closes, no OS is installed, don't worry. In any case, restart the system and run MIUI 12. My experience with Miui 12 on Redmi K20, if you are wondering if you should install MiUi 12 or less, then my recommendation would be to continue with the installation.I found no bugs during my testing and the UI/UX is a significant step up in relation to last year's MIUI 11. In fact, the new gestures, control center, and animation are so good that you have to try MiUi 12 for now. I haven't had any lags or freezes performance wise, which is amazing, because it's the first beta release. Also, the battery life is quite good - it's not used in the stable MIUI 11 - but it can be used to the fullest. In addition, you can change the language to English and install the Play Store and other Google services directly from EPEAP. Overall, my experience with MIUI 12 has been quite good so far and you can definitely try it out on your Xiaomi device. Now try MIUI 12 on your Xiaomi phone so that you can install MIUI 12 and experience a new UI on your Xiaomi device. I have provided all the steps. So, review and I'm sure the MIUI 12 will introduce you easily. However, in addition to the above devices, Xiaomi MIUI 12 Rome for Poco F1 has not released, which is a problem. As soon as we can bring MIUI 12 together for Poco F1, we will let you know. And if you encounter a problem while installing MIUI 12, write the comment below. We will definitely help you. Just a few days ago on August 12, 2020, Xiaomi Muii 12 announced in India. It comes with a new design and new animations. Now, MiUi India has announced the arrival of MiUi 12 via its official social media in the Redmi Note 8 Pro in India. This update also contains a vanilla variant of the smartphone. Xiaomi has promised to introduce MIUI 12 to Indian users this month. More devices will be updated soon. According to Twitter, the MIUI 12 update size is in Redmi Note 8 for 641 Mb. Redmi Note 8 Pro in India Now Get MIUI 12 Updates. There is no official comment from Xiaomi, that 'is it a progressive introduction or not. But it will always be clear in a few days. Redmi Note 8 Pro users can download the update at Settings > About your phone > System updates and determine if there is an update or not. If there are any, click Download / Installation and start the update. One of the Twitter users shared the Changelog details and mentions that the update with mount number V12.0.1.0 QGGINXM contains and has a download size of 641MB. A new MIU 12 is comingImproved Dark Mode introduced in MIUI 11 Xiaomi has focused on increasing privacy protection for all Indian consumers. The main update introduced by Xiaomi in MIUI 12 is the app drawer. Many Xiaomi smartphone users said it was a gadget drawer to keep it convenient, and Xiaomi heard it. In addition, an interesting feature added to the camera module of the program is the Magic Clone function. Sliding window support has also been added for multitasking and replying to all important messages about something else. Other.
